

Operations and product leader with 15+ years of building software products from zero to one at a global scale. Expertise spans engineering, program and product management, and business operations. Track record includes launching consumer apps to tens of millions of users worldwide at BMW, building program and product management practices from scratch at a high growth consultancy, and serving as the first business hire at an early-stage developer tools startup where revenue grew 3.5x in under a year. Comfortable leading across sales, finance, legal, and go-to-market while staying hands on with modern tooling and product itself.

EXPERIENCE

Founding Operations Lead/Head of Operations

Shorebird, Chicago, Illinois (Remote)

February 2025– Current

- Joined as the first non-engineering hire to build business operations from the ground up. Responsibilities span finance, legal, sales, marketing, and customer support.
- Drove 2x user growth and 3.5x revenue growth within the first 12 months through a combination of pricing strategy, enterprise sales, and go-to-market execution.

Director, Product Development

Very Good Ventures, Chicago, Illinois (Remote)

August 2023 – January 2025

- Founded and led VGV's first internal Product Development team.
- Defined team charter, hiring, and roadmap to deliver tooling and products that accelerated delivery across client-facing engineering teams.
- Managed and grew the VeryGoodOpenSource GitHub organization including repositories used by the larger Flutter/Dart communities including Very Good CLI (2.4k+ GitHub Stars), Very Good Analysis, and Very Good Core.

Principal Program Manager, Head of Program Management

Very Good Ventures, Chicago, Illinois (Remote)

January 2021 – July 2023

- Built the Program Management team at Very Good Ventures from zero. Established team structure, delivery standards, and operational processes that scaled with the company's rapid growth.
- Grew and managed a globally distributed team of 6 to support an expanding client portfolio.
- Owned all PM tooling including resource planning, time tracking, reporting, and invoicing. Led 2 company-wide tool migrations including moving to Kantata for operational efficiency across all teams.
- Member of the management team that executed the acquisition of CreateThrive (June 2023), expanding VGV's global footprint.

Senior Product Owner

BMW Technology Corporation, Chicago, Illinois

October 2016 – November 2020

MyBMW/MINI Application

- Doubled size of development team to 9 developers and 1 automation engineer to increase product output based on business demand.
- Worked directly with development and architecture to establish the use of Flutter within BMW for fast and reliable updates across mobile OS platforms (iOS & Android) simultaneously.

- Had ownership of core features from the engineering and product side including Login, Account Create, and Vehicle Mapping.
- Led zero-incident global launch of a brand new codebase across 6 markets, acquiring 35,000+ new users within 7 days of release.

Aftersales

- Led product planning across multiple Aftersales teams for BMW Connected, owning features including Service/Recall Alerts, Dealer Search, and Online Appointment Booking.
- Grew the Aftersales group from 3 to 7 teams through rebalancing and staff expansion of 17 people.
- Managed 4 product owners across 7 development teams with a total of 42 people.
- Established new processes to handle the expansion of teams and features including a new feature pipeline and feature change review in order to facilitate faster release cycles.

Android

- Started new development team and backlog from scratch to develop the BMW Connected for Android product.
- Launched the first version of BMW Connected for Android. Continued to drive the product development for our Android application through version 5.0. Saw a 1.5-star rating increase over the course of these releases.

Product Owner

BMW Technology Corporation, Chicago, Illinois

November 2014 – October 2016

- Part of initial product management team for the new BMW Technology Corporation office in Chicago, IL.
- Led 2 teams of approximately 6 engineers each during the development of the new BMW Connected application for iOS.
- Designed and ran BMW's first external beta test with 1,000 users. Gathered valuable feedback from real users that helped shape the new BMW Connected application.
- Drove design and development teams for the BMW Connected debut at CES 2016. Attended CES as BMW Technology Expert.
- Served as release manager for iOS. Included setting up metadata delivery process for fast and easy App Store updates.

Product Owner

Microsoft, Chicago, Illinois

April 2014 – November 2014

- Focused on bringing Microsoft Services to the 100 Million Monthly Users' of the Xpress Browser.
- Drove backlog for one development team.
- Defined requirements and led team through development of new browser landing page content utilizing the MSN Weather API.
- Led definition, development, and deployment of OneDrive integration with the Xpress Browser for Asha Devices.

Product Owner

Nokia (Acquired by Microsoft), Itasca, Illinois

May 2013 – April 2014

- Led the redevelopment of Nokia Xpress for Lumia for Windows Phone 8 in a new Agile based methodology.
- Created a new UX/UI paradigm which allowed users to access their content faster.
- Worked with many offsite teams, including phone program management and application technical readiness, to secure Nokia Xpress as a mandatory preloaded application on Lumia devices.
- Launched Nokia Xpress on Lumia and acquired over half a million users in less than one year.

Senior Software Engineer

Nokia, Itasca, Illinois

February 2012 – May 2013

Windows Phone

- Prototyped and then led development of Nokia Xpress for Windows Phone. Prototype was developed in spare time with two other colleagues before being picked up for full time development.
- Developed main application architecture and led feature design.
- Led team in adopting Agile practices including moving to a DevOps model.

Asha

- Provided architecture guidance on all feature implementations as a senior member of the Web Apps platform team.
- Promoted and participated in the first Nokia Browser team hackathon. Led a webinar introducing engineers to Web Apps. Contributed to a Web App game that won best hack.

Software Engineer

Nokia, Itasca, Illinois

July 2010 – February 2012

- Implemented a JavaScript library used for client-side manipulation.
- Created templates, samples and code snippets for the Nokia Web Tools product.
- Took on role of ScrumMaster for the S40 Web Apps team during our program's transition to Agile.
- Represented Xpress at Nokia World 2011 and participated in Nokia World Hackathon as a technical expert.
- Published, on my own time, two S40 Web Apps to the Nokia Store.

Adjunct Professor

DeVry University, Addison, Illinois

November 2010 – May 2011

- Taught CIS-170C (Programming with Lab) with 20 students. Course content included introduction to C++ & Visual Studio, programming concepts, and a final project that demonstrated basic programming ability.
- Taught SEC-360 (Data Privacy and Security) with 7 students. Course content was focused around enterprise security including hardware, software, and security policies.

UI Software Engineer

Novarra Inc. (Acquired by Nokia), Itasca, Illinois

October 2009 – June 2010

Quality Assurance/Development Intern

Novarra Inc., Itasca, Illinois

June 2007 – October 2009

EDUCATION

Master of Business Administration with Concentration in Information Systems Management

Keller Graduate School of Management, Schaumburg, Illinois

GPA 3.75/4.0 (With Distinction)

March 2009 – October 2010

Bachelor of Science, Computer Information Systems with Concentration in Computer Forensics

DeVry University, Addison, Illinois

GPA 3.95/4.0 (Summa Cum Laude)

July 2006 – March 2009

AWARDS/ACHIEVEMENTS

- Windy City Curling Club
 - President – August 2020 – June 2021
 - Vice President – June 2019 – August 2020
 - Arena Nationals Men’s Team – 2019
- DeVry Chicago Metro Graduation Speaker, Addison Campus – March 2009
